EDUCATION

Veer Surendra Sai University of Technology
B.Tech in Electronics and Telecommunication, CGPA: 7.92
EMMA +2 Higher Secondary School
Intermediate in Science, Percentage: 84%

Burla, Sambalpur
Sep 2023 – Jun 2027
Patara, Balasore
Mar 2020 – Feb 2022

EXPERIENCE

Indian Institute Of Technology, Bhubaneswar
Project Intern

Dec 2025 – Jan 2026
Bhubaneswar, Odisha

- Designed an **AI-driven decision-support system** integrating NDVI/NDWI, weather data, and historical yield records to predict crop yield and optimize farm-level decisions.
- Developed **hybrid ML models** (regression + rule-based AI) to identify water stress, disease risk, and nutrient-related issues at field level, enabling early diagnosis and actionable recommendations.
- Built an end-to-end **ML pipeline** covering data preprocessing, feature engineering, model evaluation, and inference, improving prediction reliability under sparse or noisy agricultural data.

IEEE VSSUT Computer Society
Technical Team Member

May 2024 – Present
Burla, Sambalpur

- Developed the IEEE VSSUT Student Branch website using modern web technologies, focusing on responsiveness, performance, and clean UI design.
- Implemented structured sections for events, achievements, and announcements to improve visibility and engagement of IEEE activities.
- Worked closely with the IEEE core team to maintain and update the website, following version control and collaborative workflows.

PROJECTS

ResumeIQ | *Next.js, Supabase, Tailwind CSS, Zustand, PDF Parsing* | [GitHub](#)

- Built an **AI-powered resume analyzer** that generates ATS scores, identifies missing skills, suggests improvements, and provides job recommendations based on resume content.
- Developed a **custom API route** to handle resume processing, AI integration, and response structuring.
- Implemented a **PDF parsing pipeline** to convert unstructured resume data into analyzable text for AI processing.
- Improved performance by implementing **client-side caching with Zustand**, reducing redundant API calls and enhancing user experience.

KrishAI | *Next.js, Supabase, Tailwind CSS, Python, ML, Satellite Data* | [GitHub](#)

- Built an **AI-based system** to predict crop yield and detect field problems using satellite, weather, and historical data.
- Used NDVI/NDWI and weather data like rainfall and temperature to analyze **crop health and water stress**.
- Applied **machine learning models** and simple logic to give suggestions for irrigation, disease risk, and yield improvement.
- Developed a **full-stack web app** using Next.js and Supabase for authentication, storage, and real-time data handling.

TECHNICAL SKILLS

Languages: Java, Python, JavaScript, HTML/CSS,

Frameworks: Next.js, Node.js, Tailwind CSS, Shadcn UI

Developer Tools: Git, Google Cloud Platform, VS Code, IntelliJ, Vercel

Libraries: React, pandas, NumPy, Scikit-learn

Coursework: Data Structures and Algorithms, Object Oriented Programming, DBMS, Web Development
