Professional Summary

Aspiring Software Engineer with a strong foundation in Java, Data Structures and Algorithms, Object-Oriented Programming, Computer Networks and DBMS. Skilled in full-stack development with React.js, Next.js, and backend API development, with expertise in developing AI-integrated applications for real-world problem solving.

Technical Skills

Programming Languages: Java, JavaScript, Python, SQL, TypeScript

Frameworks: React.js, Next.js, Tailwind CSS

Libraries/Tools: Shadcn UI, Git, VS Code, IntelliJ, Vercel, PyTorch

Core Concepts: Data Structures and Algorithms, Computer Networks, Object-Oriented Programming

Experience

Indian Institute Of Technology, Bhubaneswar

Dec 2025 – Jan 2026

Project Intern

Bhubaneswar, Odisha

- Engineered an **AI-powered decision support system** integrating satellite indices (NDVI/NDWI), weather data, and historical crop yield records to improve predictive analytics and farm-level decision making.
- Built and optimized **Machine Learning models** using regression and rule-based techniques to detect water stress, crop disease risk, and nutrient deficiencies for early diagnosis.
- Engineered an end-to-end **ML pipeline** including data preprocessing, feature engineering, model training, evaluation, and inference to improve prediction accuracy on agricultural datasets.

IEEE VSSUT Computer Society

May 2024 – Present

Web Team Lead

Burla, Sambalpur

- Led the development and maintenance of the official IEEE VSSUT Student Branch website, building scalable and responsive web interfaces using modern frontend technologies .
- Designed and implemented dynamic sections for **events, achievements, and announcements**, improving content accessibility, user engagement, and overall website usability.
- Collaborated with cross-functional team members using **Git/GitHub** and followed structured development workflows for feature updates, debugging, deployment, and continuous website improvements.

Projects

ResumeIQ | *Next.js, Supabase, Tailwind CSS, Zustand, PDF Parsing, LLM API* | GitHub | Live Demo

- Built a **full-stack career intelligence platform** for ATS analysis, enabling resume scoring, skill gap detection, personalized feedback, and intelligent **job recommendations**.
- Developed a PDF parsing and data processing pipeline to extract unstructured resume data, integrated LLM/API-based AI services for contextual evaluation, and automated response generation through custom backend APIs.
- Designed a **role-based interview preparation system** generating domain-specific interview workflows, while implementing **secure data storage** with Supabase PostgreSQL, Zustand state management, and client-side caching for performance optimization.

KrishiAI | *Next.js, Supabase, Python, ML, Tailwind CSS, Satellite Data, LLM API* | GitHub | Live Demo

- Developed an **intelligent agriculture system** integrating predictive analytics, satellite data processing, and crop health monitoring to enable data-driven farming decisions.
- Integrated **LLM/API-based conversational assistant** to provide real-time farmer assistance, agriculture query resolution, and actionable recommendations for crop management and field-level decision making.
- Implemented an intelligent **plant disease detection system** using **leaf image analysis**, satellite indices (NDVI/NDWI), and backend data pipelines to identify crop health issues, predict disease risk, and generate personalized farming recommendations.

Education

Veer Surendra Sai University of Technology (VSSUT), Burla

2023 – 2027

Bachelor of Technology in Electronics and Telecommunication — CGPA: 8.00/10

Sambalpur, Odisha

Achievements

- Selected as a **Finalist in IEEE YESIST12 2026 International Hackathon**, qualifying for the global grand finale in Indonesia.
- Solved 150+ LeetCode problems, strengthening problem-solving skills in Data Structures and Algorithms .
